

G.I. Detox+®

ZEOLITE, CHARCOAL & HERBAL FORMULA

GENTLE FULL-SPECTRUM BINDER*

AVAILABLE IN 60 COUNT CAPSULES

It happens on a daily basis. Toxic exposure. Mold, poor diet, compromised food or water quality, air pollutants, elevated stress, disrupted sleep. It's an unfortunate reality in today's world.

But did you know? Toxicity can also be aggravated by imbalances in the microbiome and microbial die-off.

That's why the binding activity of G.I. Detox+® is an essential part of any treatment strategy that includes removal. A simple solution for microbial debris, environmental toxins, and metabolites produced as part of normal living.*

G.I. Detox+® provides a gentle, well-tolerated method of assisting detoxification.* By intercepting contaminants and facilitating elimination in the stool, it reduces the liver's detoxification workload, ensuring patient comfort and compliance.*

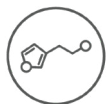

Integral to protocols using Biocidin®, G.I. Detox+® is formulated to provide broader activity than a single-ingredient product.* It blends zeolite, activated charcoal, silica, apple pectin, humic powder (Humiplex®), and aloe vera. Binding and detoxification agents long used in traditional medicine and supported by modern research.

As Biocidin® works on biofilms and mobilizes unwanted microbial byproducts, G.I. Detox+® binds and clears.*

Microorganisms balanced. Biofilms dismantled.
Detoxification done right.

DETOX

Intercept and eliminate toxins. How can you optimize toxin removal and fat digestion? Make it safe – even comfortable? First, promote the production and flow of bile. Then, intercept and eliminate unwanted toxins and microbial byproducts. Enhanced function. Detoxification done right.

Benefits

- Assists in “mop up” of microbial and biofilm components*
- Supports healthy detoxification and full-body cleansing*
- Supports clearance of mold metabolites*
- Helps in the neutralization of histamine*
- Supports a more comfortable cleansing experience*
- May reduce bloating and gas*
- Supports mental clarity*

Features

- Professional-grade ingredients
- Multi-ingredient formula provides broad-acting binding activity*
- Contains Humiplex®, a patented blend of humic and fulvic acids that binds heavy metals and toxins, provides essential trace minerals, and aids nutrient absorption*
- Contains ingredients known to assist in detoxification of environmentally and endogenously produced metabolites*
- Recommended addition to treatment plans with Biocidin® and Proflora® 4R
- Bottle made from 50% post-consumer recycled plastic

G.I. Detox +[®]

ZEOLITE, CHARCOAL & HERBAL FORMULA

Clinical Focus: Who's It For?

- As part of the Bioclear[®] Microbiome Detox Program, for those seeking an annual or semi-annual cleanse/microbial reset*
- Anyone seeking to minimize discomfort during a microbial cleanse*
- Anyone looking to support detoxification*
- Those addressing gas, bloating, headaches, and brain fog from dietary or environmental exposure*
- Those exposed to poor food and water quality and experiencing sudden intestinal discomfort

Suggested Usage

1 capsule on an empty stomach with a full glass of water or as directed by a healthcare professional. Take 1 hour apart from other medications and supplements.

Not recommended for use during pregnancy.

Supplement Facts

Serving Size: 1 capsule

Servings Per Container: 60

AMOUNT PER CAPSULE

Proprietary Herbal Blend: 500 mg[†]

Zeolite clay, Activated charcoal, Aloe vera[‡] leaf extract, Apple pectin, Silica, Humic powder (Humiplex[®])

[†]Daily value not established.

Other Ingredients: Vegetable capsule (Hydroxypropyl methylcellulose and water)

[‡]Organic ingredient

This product is made without dairy, gluten, soy, corn, animal products, artificial coloring or flavoring.

Ingredient Mechanisms of Action

Scientific literature shows that the individual ingredients in G.I. Detox +[®] have multiple activities. Below are highlights that may account for the outcomes seen in a clinical setting.

Binds and Eliminates – The nutrients in G.I. Detox +[®] are both adsorbent and absorbent, providing broad-spectrum binding capabilities. Once bound, irritants and toxins are neutralized and moved out of the body.

Histamine Binding – Research shows that most of the binders in G.I. Detox +[®] actively bind significant amounts of histamine, offering gastroprotective properties and downregulating the histamine feedback loop.

Supports Microbial Balance – Aloe vera acts on unwanted organisms. Complementary binding activity paves the way for beneficial microbes to thrive by removing debris that influences them.

Immunomodulatory – Aloe vera and Zeolite directly interact with the immune system to support healthy function.

Supports Healthy Inflammatory Response – Binding and eliminating irritants plays a vital role in reducing the burden on the immune system. Additionally, Aloe vera, Apple pectin, Humic powder (Humiplex[®]), and Zeolite all have antioxidant properties.
